

## Smart Notebook Project

Each group will be given one chapter to design a Smart Notebook lesson on. You will use your textbooks, and this is where the bulk of the information will come from.

You are expected to type your notes in smart notebook with a **font of 24**.

Include all important information and then go on the Internet to find pictures that goes along with the information.

Using the Internet tab "videos" or "Youtube" you will be expected to find some videos to help explain the topic you are researching. You will be expected to include this link attached to a picture. (I will show you how this is done)

Within the chapters there are activities or labs, also use theses to help explain notes. You may even find the same labs done on a video.

Chapter 9 -Light, Color and Radian Energy Page 266-301

Chapter 10 - A World of Water Page 310-341

Chapter 11 - The Oceans Page 342 - 379

Chapter 12 - Water, Climate, and Human Activity Page 378 - 407

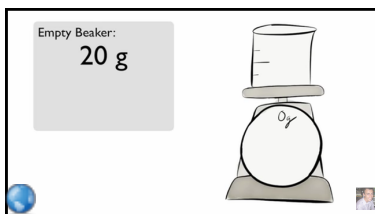

You will be marked on the following:

**Use of computer time**

**Contribution to the group work** (Reflection from each student will be collected at the end of the project and graded. This reflection is something only I will see, so be totally honest about who is or is not working within the group)

**Content** - Did you include all topics within the unit?

- Were there pictures and videos that ONLY went along with the topic you are researching?
- Use of proper grammar and spelling (Most of the material is coming from your text book)
- Creativity
- Similar layout to what you have seen in class lessons by Mrs. O'Keefe

\*Find video online

\*Use camera on smart notebook to take picture of video 

\*Then right click your mouse over the link in the browser, this will make it blue. Click on copy

\* Go back to your smart notebook page. Your snapshot picture should be there. Now Right click on it and a box will appear. Click on link

This will open a new box. In the empty space beside link right click and hit paste.

Then hit OK
