Unit 5

Percent, Ratio, and Rate

Social Security: Worker to Beneficiary Ratio

Source: Social Security Administration Trustees Report Table IV.B2  
Ratio of covered workers to beneficiaries

\* Percent to Decimal

*Study* - divide the percent by 100

34% = 0.34  
because 34 / 100 =

52% = 0.52

\* Decimal to Percent

- multiply by 100

0.2 = 20%  
because 0.2 x 100 =

0.378 = 37.8%  
because

0.378 x 100

*stopped in thousandths*

0.125 =  $\frac{125}{1000} \div 25 = \frac{5}{40} \div 5$

=  $\frac{1}{8}$

Decimal to Fraction

-Place values help

\* the place value is the denominator

\* NO decimals in fractions

-Always reduce

Fraction to Decimal

-Divide top number by bottom number on a calculator

$\frac{2}{7} = 0.285$   
= 28.5%

- Some fractions you can write as equivalent fractions with denominator of 100

$\frac{7}{20} = \frac{35}{100} = 0.35$

Percent to Fraction

-Whole number put over 100

26% =  $\frac{26}{100} = \frac{13}{50}$  (Reduce)

- NO Decimals in fractions so write equivalent fractions

12.5% =  $\frac{12.5}{100}$  not a fraction  
=  $\frac{125}{1000}$

Relating Fractions, Decimals and Percent

What is percent?

Percent is a special ratio where the second term is always 100 or it is out of 100.

How do you change a percent to a decimal or fraction?

% to Decimal  
÷ 100

Percent	Reduce Fraction	Decimal
18%	$\frac{18}{100} \xrightarrow{\div 2} \frac{9}{50}$	$18\% \div 100 = 0.18$
75%	$\frac{3}{4} \times \frac{25}{25} = \frac{75}{100}$	0.75
$0.45 \times 100$ 45%	$\frac{45}{100} \xrightarrow{\div 5} \frac{9}{20}$	0.45
35%	$\frac{7}{20} \times \frac{5}{5} = \frac{35}{100}$	0.35
83%	$\frac{83}{100}$	0.83
$55.\overline{5}\%$	5/9	$0.\overline{55}$

$\frac{1}{9} = 0.\overline{1}$   
 $\frac{2}{9} = 0.2$   
 $\frac{3}{9} = \frac{1}{3} = 0.\overline{33}$

$\frac{1}{9} = 0.\overline{1}$   
 $\frac{5}{9} = 0.\overline{5}$

Think test results

What is the decimal value? the percentage?

$$\frac{62}{82} = 0.\overline{75609} \quad \xrightarrow{\times 100} \quad 75.609\% \approx 76\%$$

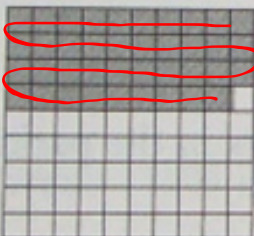

*decimal*      *%*

$62 \div 82$

We can use a hundred chart to represent one whole or 100%.  
Each small square represents 1%.

Each hundred chart represents 100%. What fraction is shaded?  
Write each fraction as a decimal and as a percent.

a)   $\frac{39}{100} = 39\%$

b) 

$$\frac{80.5}{100} = 80.5\%$$

One small square on a hundred chart can be enlarged to show 100 squares. This is called a hundredths chart.

Each small square of a hundredths chart represents  $\frac{1}{100}$  of 1%, or  $\frac{1}{100}$  %, or 0.01%

Percent to decimal remember to divide by 100

Be careful not to confused a decimal percent to a decimal

0.2% is 0.002 as a decimal

0.007% = 0.00007 as a decimal

*Handwritten notes:*  
A blue arrow points from the text "this is percent" to the percent sign in "0.2%".  
A blue squiggly line underlines "0.007%".  
A blue arrow points from the percent sign in "0.007%" to the text "÷ 100".

Write each percent as a fraction and a decimal:

	Decimal	fraction
(a) 7%	$7\% \div 100$ 0.07	$\frac{7}{100}$
(b) 7.75%	$7.75\% \div 100$ 0.0775	$\frac{775 \times 100}{100 \times 100} = \frac{775 \div 25}{10000 \div 25} = \frac{31}{400}$
(c) $7\frac{1}{4}\%$	$7.25\% \div 100$ 0.0725	$\frac{725 \div 25}{10000 \div 25} = \frac{29}{400}$

Write each fraction as a decimal and as a percent:

(a)  $\frac{5}{8}$       **Decimal**      **Percent**  
 $5 \div 8$       62.5%  
 = 0.625

(b)  $\frac{5}{6}$       0.8 $\bar{3}$       83. $\bar{3}$ %

(c)  $\frac{5}{1000}$       0.005      0.5%

Buffy had  $23\frac{1}{2}$  out of 30 on her math test

She had  $21\frac{1}{2}$  out of 40 on her second math test

On which test did Buffy do better?

Use calculators

Test 1)

$$\frac{23.5}{30} \quad \text{Top: Bottom decimal} \quad \frac{235}{300} = 0.78\bar{3} \Rightarrow 78.\bar{3}\%$$

Test 2)

$$\frac{21.5}{40} = 0.5375 \Rightarrow 53.75\%$$

Test 1 Buffy did better on.
