

Northern hemisphere is the top part of Earth  
Remember we live on the northern hemisphere

Southern hemisphere is the bottom part of Earth

The Earth's Revolution around the sun along with its tilt causes the season.

It takes Earth 365 days (1 year) to make a complete orbit around the sun. This is known as the orbital period.

Main point

Winter in Northern Hemisphere since it is pointing away from the sun. Summer in the Southern Hemisphere since it is pointing towards the sun.

Summer in Northern Hemisphere since it is pointing toward the sun. Winter in the Southern Hemisphere since it is pointing away from the sun.

## A Day in the Life Aboard the International Space Station

Have you ever wondered what it would be like to live and work in space? Follow astronauts on the [International Space Station](#) in a series of videos as they explain their daily routines.

Educators can use this series of videos and resources to enhance K-12 science, technology, engineering and mathematics curricula.
