

Warm Up

Nov. 6, 2017

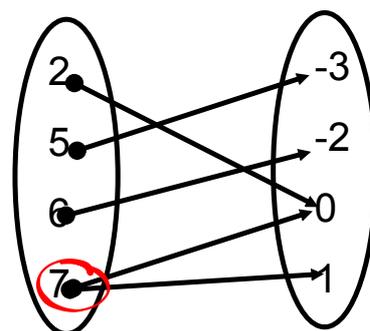

1) Given the following arrow diagram

a) State the domain $\{2, 5, 6, 7\}$

b) State the range $\{-3, -2, 0, 1\}$

c) Is this a function or not? How do you know?

Not a function since $x=7$ is repeated twice

2) Given the following set $\{(1, 3), (2, 6), (-1, 8), (5, 7), (-2, 4)\}$

a) State the domain $\{-2, -1, 1, 2, 5\}$

b) State the range $\{3, 4, 6, 7, 8\}$

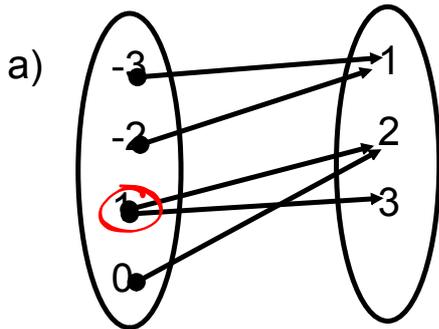

c) Is this a function or not? How do you know?

Function since no 'x' value is repeated

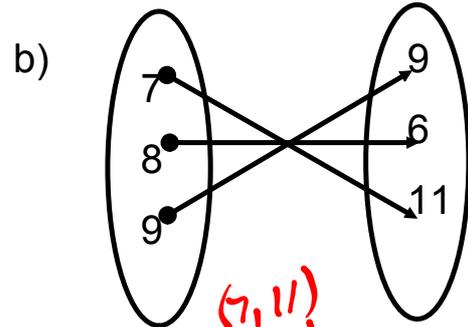

Homework Questions

pg 270 #4,5,8 Pg 294 #4a,b, 7

State which of the following relations are functions. Explain your answers.

Not a function since $x=1$ is repeated

$(7, 11)$
 $(8, 6)$
 $(9, 9)$
 No repeats in x
 So it is a function

c)

x	y
10	2
11	2
12	2
12	2

Hint -graph it if you are unsure

$x=12$ is repeated
 So Not a function

d)

x	y
-5	3
-3	4
1	7
1	8
2	4

$x=1$ is repeated
 So Not a function.

Dots → Connected
Discrete and Continuous Data

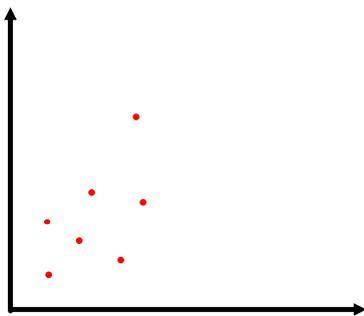

Discrete Data

- points are not joined together with a line on the graph.
- A finite number of values exist between points
- hint ask yourself can you have part of a "x" value. If no then discrete

Continuous Data

- points are joined together with a line on the graph.
- A infinite number of values exist between points
- hint ask yourself can you have part of a "x" value. If yes then continuous $\{x \mid _ \leq x \leq _, x \in _ \}$

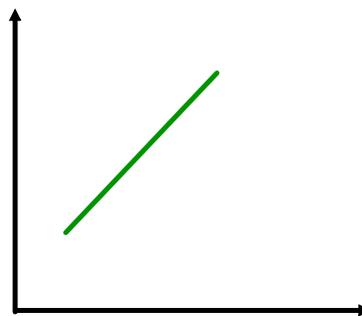

Examples)

Discrete

with dots then

$$\left. \begin{array}{l} x \in W \\ x \in I \\ x \in N \end{array} \right\} \begin{array}{l} y \in W \\ y \in I \\ y \in N \end{array}$$

Continuous

with line

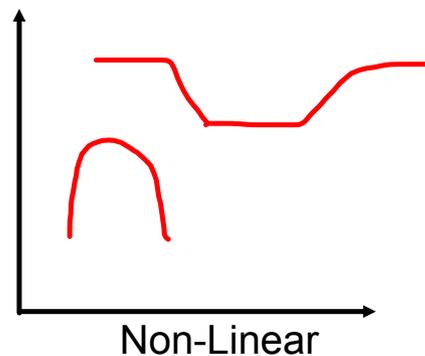

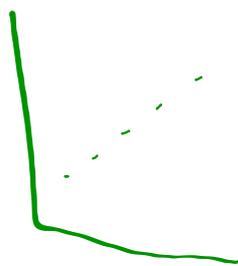

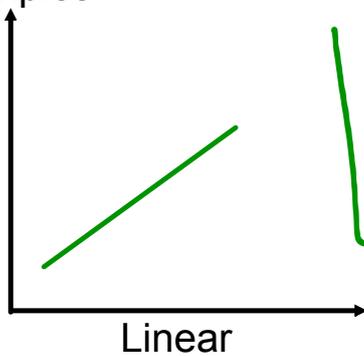

$$\begin{array}{l} x \in R \\ y \in R \end{array}$$

Linear & Non-Linear

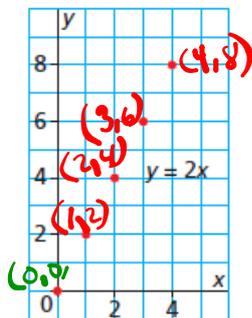

Linear graphs - the data is a straight line
(Doesn't have to be connected)

Non-Linear graphs - the data is NOT a straight line
- It can curve or spread out with no real pattern.

Examples

Using the graph write the domain and range.

x	y
0	0
1	2
2	4
3	6
4	8

Use two ways to represent both (Since it is DOTS)

Method 1

Domain: $\{0, 1, 2, 3, 4\}$

Range: $\{0, 2, 4, 6, 8\}$

Method 2

Domain: $\{x \mid 0 \leq x \leq 4, x \in \mathbb{I}\}$

Range: $\{y \mid 0 \leq y \leq 8, y \in \mathbb{I}\}$

Is this graph linear or non-linear?

Yes, straight line of dots.

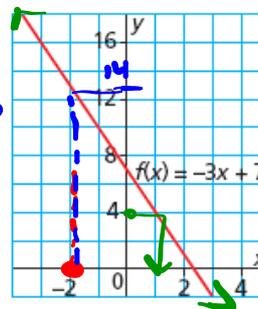

Is this graph continuous or discrete? Discrete

Example 4

Determining Domain Values and Range Values from the Graph of a Function

Here is a graph of the function $f(x) = -3x + 7$.

- a) Determine the range value when the domain value is -2 . $x = -2$ $y = ?$ 13
- b) Determine the domain value when the range value is 4 . $y = 4 \Rightarrow x = ?$ $+1$

SOLUTION

$$f(x) = -3x + 7$$

let $x = -2$

$$-3(-2) + 7$$

$$6 + 7$$

$$f(x) = 13$$

$$y = 13$$

$$f(x) = -3x + 7$$

$$4 = -3x + 7$$

$$4 - 7 = -3x + 7 - 7$$

$$-3 = -3x$$

$$\frac{-3}{-3} = \frac{-3x}{-3}$$

$$1 = x$$

CHECK YOUR UNDERSTANDING

Activate Prior Learning:

Writing Inequalities

The inequality signs are:

$<$ less than \leq less than or equal to
 $>$ greater than \geq greater than or equal to

To write an inequality that corresponds to a statement, replace the words that represent the inequality with the corresponding sign.

g is greater than or equal to 5:

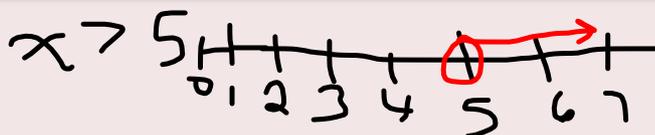

$$g \geq 5$$

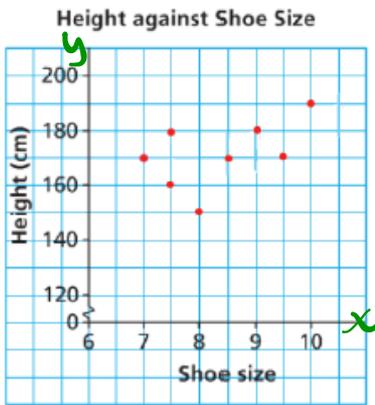

Since 5 is part of the solution, we draw a shaded circle at 5.

5.5 Graphs of Relations and Functions

Domain $\{7, 7.5, 8.5, 9, 9.5, 10\}$

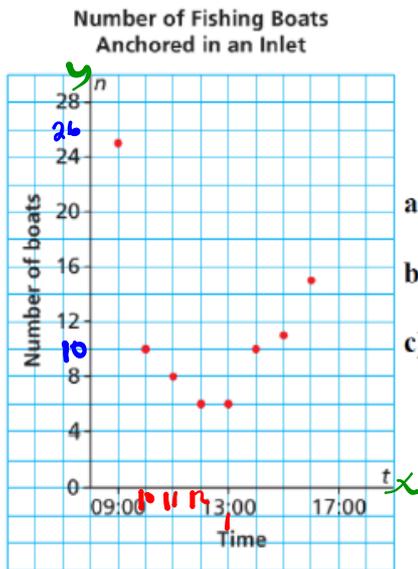

Range $\{160, 170, 180, 190\}$

- a) State the domain & range.
- b) Is this relation a function?
- c) Why are the points not connected? Explain.

Not a function since $x=7.5$ is repeated twice

↓ No because we cannot have $7\frac{1}{4}$ shoe size.

x Shoe size	y height
7	170
7.5	160
7.5	180
8.5	170
8.5	180
9	180
9.5	170
10	190

domain {9, 10, 11, 12, 13, 14, 15, 16}
 range {6, 8, 10, 11, 15, 25}

a) State the domain & range.

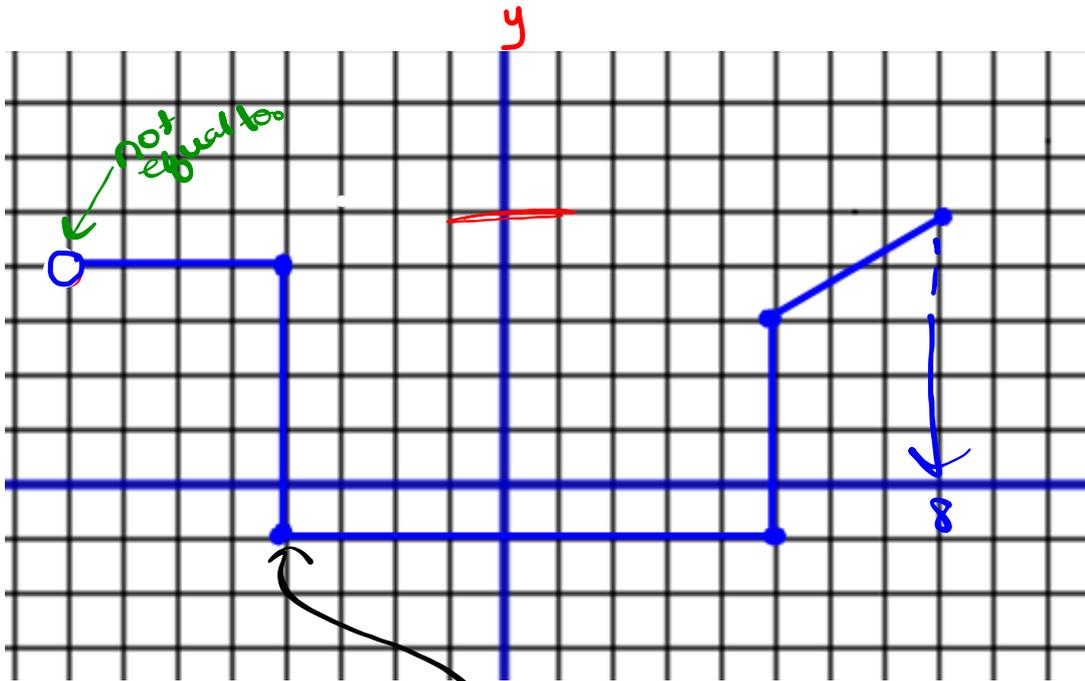

b) Is this relation a function Yes no repeated x

c) Why are the points not connected? Explain

Not connected
 since you cannot have part of Boat docked.

x Time	y # of Boats
9	25
10	10
11	8
12	6
13	6
14	10
15	11
16	15

1 ←
2 ←

Discrete/ Continuous:

Function/ Non-Functions *fails*

Domain & Range

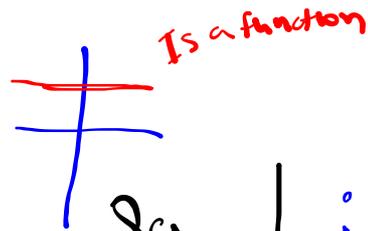

Linear or Non-linear

$$\{x \mid -8 < x \leq 8, x \in \mathbb{R}\}$$

$$\{y \mid -1 \leq y \leq 2, y \in \mathbb{R}\}$$

Class/Homework

Is a function

Page 294 - 296:

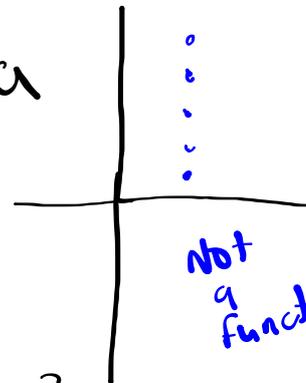

Questions: 6, ~~7~~, 8, 9

PAGE 299:

QUESTIONS: ~~3~~

$$\{x \mid _ \leq x \leq _, x \in _ \}$$

$$\{y \mid _ \leq y \leq _, y \in _ \}$$

Not a function
