

# Currency: The system of money a country uses.

**exchange rate:** the price of one country's currency in terms of another nation's currency

- exchange rates fluctuates day to day.
- international trade depends on currency.
- banks, travel agents, business owners, tourists must consider exchange rates.
- may need to order in advance and fees are involved.

*Dean displays oysters ready for sale at Rodney's Oyster Depot. After a shipment of oysters is received, the oysters are graded and sold to domestic and international customers.*

### MATH ON THE JOB

Dean MacEachern grew up in Cornwall, Prince Edward Island, and attended Bluefield High School in Hampshire. Dean is now the plant manager for Rodney's Oyster Depot. "My main duties are shipping and receiving of oysters. I also do the sales to and invoicing of clients," he says. Dean is also responsible for ensuring that the quality of the oysters he sells meets or exceeds the standards set by the Canada Food Inspection Agency (CFIA).

Oyster distributors from different countries purchase oysters, by the piece, from Dean. He must ask for and compare price quotes in the currency of the country the oysters will go to. When selling oysters to an American distributor, Dean uses information on the exchange rate, gathered over a 60-day cycle, to estimate a competitive price he can sell the oysters for. The exchange rate changes every day during this cycle. What strategies can Dean use to estimate a competitive price?

### SOLUTION

Dean could use exchange rate information from a 60-day cycle to calculate an "average" oyster price for this period. The average price would be a competitive price he could negotiate for with the American distributor.

**EXAMPLE #1:**

On a specific date, the selling rate for the Danish krone compared to the Canadian dollar is 0.221778<sup>CAD</sup>. How many kroner will you receive for \$500.00 CAD?

Let's do a  
conversion...

Delete to reveal

**HINT**

The unit of Danish currency is the krone, which is the Danish word for crown. The plural of krone is kroner.

$$\$ 500 \text{ CAD} \times \frac{1 \text{ Krone}}{0.221778 \text{ CAD}} = 2254.51 \text{ Kroner}$$

£  
Pound

€  
Euro

\$  
Dollar

**EXAMPLE #2:**  $2254.51 \text{ Kroner} \times \frac{0.210778 \text{ CAD}}{1 \text{ Kroner}}$

On the same day as the previous example, the buying rate for kroner was 0.210778<sup>CAD</sup>. If, after purchasing your kroner, you decided not to go to Denmark and sold the kroner back to the bank, how much would you lose?

*By converting*

$$2254.51 \text{ Kroner} \times \frac{0.210778 \text{ CAD}}{1 \text{ Kroner}} = \$475.20$$

**LOSS:  $500 - 475.20 = \$24.80$**

**EXERCISE:** Use the table on page 45 to answer the following questions.  
(Solutions on the next slide)

1) Calculate the amount of money you would receive in Canadian dollars if you sold 4500 shillings to the bank.

2) Arnold is making a movie in Thailand, his travel allowance is \$3000. How much money will he have in the local currency for his expenses in Thailand.

← Kenya →

$$\textcircled{1} 4500 \text{ Shilling} \times \frac{0.012510 \text{ CAD}}{\text{Shilling}} = \$56.30 \text{ CAD}$$

$$\textcircled{2} \$3000 \text{ CAD} \times \frac{1 \text{ baht}}{0.035120 \text{ CAD}} = 85421.41 \text{ Baht}$$

$$\begin{array}{l} \$650 \text{ CAD} \times \frac{1 \text{ Euro}}{1.644814 \text{ CAD}} \\ \text{(In France)} \\ \times \text{Bank Selling} \\ = 395.18 \text{ Euros} \end{array}$$
