

UNIT 1 - An Overview of Environmental Science

- *The Issues*
- *Population Growth and Resource Limitations*
- *Researching Current Environmental Issues*

What is your ecological footprint?

How many planets would we need if everyone lived like you? An **ecological footprint** measures the total amount of land and resources used, it includes your **carbon footprint** but goes further. Find out your **ecological footprint** by answering questions about your lifestyle. See how your choices affect the environment and whether you are living beyond the capacity of the planet.

Ecological footprints allow people to visualize the impacts of their consumption patterns and activities on ecosystems.

An average world citizen has ecological footprint equivalent to 2.3 hectares or 5.6 acres while the biologically productive land available is only 1.9 hectares per person.

The average resident of the United States lives at a consumption level that requires 9.7 hectares of bioproductive land. If everyone in the world adopted a North American lifestyle, we'd need about four more planets to support us all.

YOUR ECOLOGICAL FOOTPRINT

Many activities impact our Footprint. If everyone lived like you, we'd need **8** Planet Earths to provide enough resources.

An average person living in Ontario needs 3.58 Planet Earths.

Here is how your Ecological Footprint breaks down

Food (9%)

- Food
- Shelter
- Mobility
- Goods
- Services

To support your lifestyle, it takes **16.9** global hectares of the Earth's productive area.

(36.3 tons of CO₂)

Category	Percentage
Energy Land	58.2%
Crop land	19.2%
Grazing Land	9.1%
Forest land	11.4%
Built-up land	1%
Fishing grounds	1.2%

Can you reduce your Ecological Footprint?

Let's do one together...

YOUR PERSONAL ECOLOGICAL FOOTPRINT print results

Congratulations on completing the first step to reducing your Ecological Footprint.

Your Ecological Footprint is: **6.6** global hectares

Your current consumption requires an area of productive land equivalent to **8.1** Canadian football fields.

6.6

Your Footprint

8.6

Global hectares

The ImagineCalgary objective is to reduce Calgary's Ecological Footprint 30% by 2036.

Your Ecological Footprint based upon your consumption: (hover over each section for additional information):

Services (34%)

- Food
- Shelter
- Mobility
- Goods
- Services

Some ideas to reduce your Footprint – follow the “take action” link below for detailed suggestions:

Energy (70% of Calgary's Footprint):

- Reduce your household energy use – turn down your thermostat when not occupied and at night, use energy efficient bulbs and replace appliances with Energy Star® rated models, add insulation and draft proofing.
- Use public transit, carpool, ride a bike or walk. Keep tires properly inflated, have your vehicle properly tuned and avoid idling.

Local Foods:

- In season, purchase locally grown foods that require less transportation and processing to get products to market.

Goods:

- Reduce consumption of one-time use products. Purchase re-usable products when possible. Avoid products that produce excess waste. Purchase goods that are made locally to reduce their transportation Footprint.

Hurray! You're a ... BUILDER

Share This Tweet this

Builders like you are aren't waiting for the solutions, they're out there creating them. Here are just a few ways you might be doing that:

- Using engineering, design or science to make stuff that doesn't trash people or the planet.
- Creating community gardens, time banks or other methods for sharing resources and strengthening community.
- Starting new businesses that foster healthy communities and a healthy planet.

Notable Builders who have done awesome things to change the world:

- Janine Beryus
- Danny Kennedy
- Jon Warner
- Wangari Maathai
- Benton MacKaye
- Omar Freilla

The SOS Community is ...
