Outer Planets - The Gas Giants Of Our Solar System (Documentary)

Pluto not a planet?

In order for an object to be a planet in our solar system it must :

Planet

In orbit around the Sun

Is (nearly) round in shape

Has cleared the neighborhood around its orbit

Pluto a Planet Again ??? not yet

Modern Space Video

Other Objects in the Solar System

The Video on "Landing on a Comet". From this notice the information we get back to earth and how. Notice how many observations are made from the pictures.

Satellites are objects that revolve around planets (first 10 minutes)

The moon is the earth's natural satellite.

How Have Astronomers Been Able to Study the Surface of Venus.docx
