15. There are 7 possible objects.

Here are the views for each object.

16.

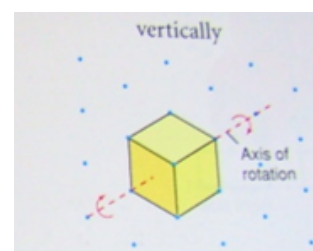

An axis can be rotated horizontally

-when an object is rotated horizontally the axis of rotations is vertical. (Can rotate clockwise or counterclockwise)

An axis can be rotated vertically

-when an object is rotated vertically the axis of rotations is horizontal. (Can rotate towards or away from you)

Always build then rotate

Draw the views (But let's put them in relation to each with the front in the center)
