The Editor...

JavaScript Blocks Editor

The micro:bit's JavaScript Blocks editor makes it easy to program your BBC micro:bit in Blocks and JavaScript.

Powered by MakeCode. If you have any issues accessing the editor, check that it isn't [blocked](#) in your school. If you need some inspiration then check out these [Projects](#).

Let's do this one together...

The image shows a screenshot of a web page titled "Rock Paper Scissors Activity". The page has a blue and purple gradient background with faint robot icons. The main heading is "Rock Paper Scissors Activity" in white. Below it is the text "Make a cool Rock Paper Scissors game in this activity!". There are four buttons: a red "Get started" button, a yellow "JavaScript Blocks" button, a yellow "Random" button, and a purple "Print lesson" button with a printer icon. At the bottom left, there are three icons: a person icon for "Ages 8+", a clock icon for "30 mins", and a robot icon for "JavaScript Blocks". A small globe icon is in the bottom left corner of the screenshot.
