LEARNING ABOUT THE b.Board...

- start with using the editor to program the micro:bit...

    * animate screen, buttons, motion, games, ...

- next, program the micro:bit to use a...

    * LED strip

    * Speaker

    * Servo

- finally, check out the tutorials on the click boards and use the simulator to test the code.

CHALLENGE...

You will be given a click board and you must program it to do something that incorporates a LED strip, a motor or a speaker - can be more than just one of these too!
