

Example: $8 \text{ cm} = \underline{\quad\quad}$ mm

$8 \times 10 = \underline{80}$ Added 1 zero to the number 8

Ex. $40 \text{ mm} = \underline{\quad\quad}$ cm

$40 \div 10 = \underline{4}$
Take away 1 zero from 40 = 4

(Take away 3 zeros from the answer)

(Take away 2 zeros from the answer)

(Take away 1 zero from the answer)

$\div 1000$

$\div 100$

$\div 10$

Ex. $5 \text{ km} = \underline{5000}$ m

Apply 3 zeros to the number

$1 \text{ km} = 1000 \text{ m}$

$5 \times 1000 = 5000$
