
Warm Up Grade 8

The equation of a linear relation is: $y = -4x + 1$

a) Create a table of values for the relation for integer values of x from -4 to 4.
b) Graph the relation.
c) Describe the relationship between the variables in the graph.

$x = -4$

$y = -4x + 1$

$y = -4(-4) + 1$

$y = (+16) + 1$

$y = 17$

$(-4, 17)$

$x = -3$

$y = -4x + 1$

$y = -4(-3) + 1$

$y = 12 + 1$

$= 13$

$(-3, 13)$

$x = -2$

$y = -4x + 1$

$y = -4(-2) + 1$

$y = 8 + 1$

$y = 9$

1. No you can not have negatives since you can not have a negative number of girls and boys.

2. You can only have whole number values, so you don't connect the points.

3 The band q would be on opposite sides, and the graph would be the same

4a) $y = 4x - 1$

Input x	Output y
