

Air Pressure

May 27

H- indicates high air pressure and it generally associates with fair or good weather

- air moves away from high pressure in a clockwise direction

L- indicates Low air pressure and it generally associates with cloudy or stormy weather

- air moves in a counterclockwise direction towards the low pressure

Climate

Climate is an area's pattern of weather over a long period of time. For example, people who live in Southern California have warm, sunny climate because so many days are warm and sunny.

Climatologist are people who study the climate. They look at temperature, average precipitation and air pressure.
