

Date: _____

Whole numbers are the numbers you count with 0,1,2,3,4,....

Integers are positive or negative whole numbers

...-3, -2, -1, 0, +1, +2, +3 ...

ZERO has no sign (used for comparing)

In this unit you MUST include the signs

when we draw

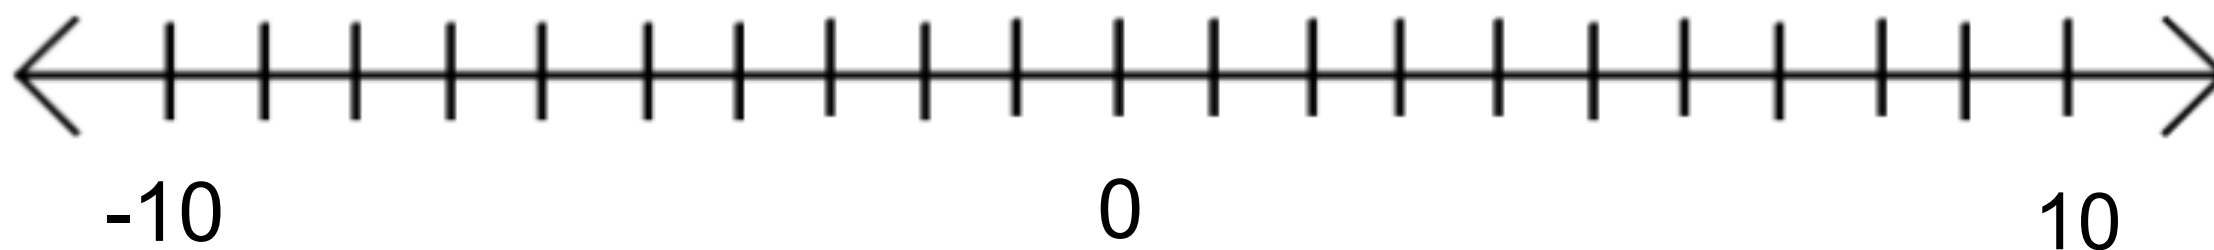

shaded +

unshaded -

Opposite integers same number with different signs.

They have an equal distance from zero

Example: +7 and -7 are opposites

Where do we see integers???

Write the opposite integer....

-10

5

13

-7

-15

Try on your own....

-1

15

-11

7

-4

What about a number with no sign?

It is positive!
