The Space Shuttle *Challenger* disaster occurred on January 28, 1986, when Space Shuttle *Challenger* broke apart 73 seconds into its flight, leading to the deaths of its seven crew members. The spacecraft disintegrated over the Atlantic Ocean, off the coast of central Florida

The **Space Shuttle *Columbia* disaster** occurred on February 1, 2003, when shortly before it was scheduled to conclude its 28th mission, the Space Shuttle *Columbia* disintegrated over Texas and Louisiana during re-entry into the Earth's atmosphere, resulting in the death of all seven crew members

The loss of *Columbia* was a result of damage sustained during launch when a piece of foam insulation the size of a small briefcase broke off from the Space Shuttle external tank

095 Comets and Meteors

Asteroids are made up of thousands of small rocky objects.

Asteroid belt is the ring of asteroids.
There is an asteroid belt found between Mars and Jupiter.

meteoroid is a lump of rock or metal that is trapped by the earth's gravity and pulled down through Earth's atmosphere.

A bright streak of light across the sky is a meteor.
